

**FIELD                      SERVICE SECTOR****Extension of accreditation for *Food Safety* unit standard 20666**

<b>Subfield</b>	<b>Domain</b>	<b>Id</b>
Hospitality	Food Safety	20666

The unit standard referred to above was registered in September 2004 following the review by the Hospitality Standards Institute of Food Safety unit standards. In the review report published at that time, the ITO overlooked that some organisations were accredited only for unit standard 167, *Practise food safety methods in a food business* (Level 2; Credits 4).

Unit standard 20666, *Demonstrate a basic knowledge of contamination hazards and control methods used in a food business* (Level 2; Credits 2) was developed as a companion unit standard for 167, and it was the ITO's intention that all organisations accredited for 167 should also be accredited for 20666.

The ITO considers that all organisations accredited for 167 should have the scope of their accreditation extended to include the domain Food Safety to Level 2. This will provide some security against future changes.

**Date report published****March 2006****New comments by date****September 2008 (unchanged)****Expiry date of new versions of the unit standards****December 2009 (unchanged)****Summary of review and consultation process**

None. The standard is not affected by this change.

**Main changes resulting from the extension of accreditation**

None.

**Impact on existing provider accreditations**

<b>Current Accreditation for</b>			<b>Accreditation extended to</b>
