FIELD ENGINEERING AND TECHNOLOGY

Revision of *Underground Extraction* unit standard 7146

Subfield	Domain	Id
Extractive Industries	Underground Extraction	7146

The Extractive Industries Training Organisation has revised the unit standard listed above, which was registered in November 2005.

Date new version published **May 2006**

Planned review date **November 2009**

Reason for the revision

To remove any reference to self-rescuers as plural because only one type of self-rescuer is used in an underground mine, therefore, the requirement for evidence to be supplied for two self-rescuers cannot be met by candidates.

Main changes resulting from the revision

All reference to self-rescuers has been changed to singular and the range statement requiring evidence for two self-rescuers has been removed.

Impact on existing provider accreditations

None.

Impact on existing qualifications

None.
