

FIELD **ENGINEERING AND TECHNOLOGY****Review of *Electricity Supply - Distribution Networks* unit standard 19953**

Subfield	Domain	Id
Electricity Supply	Electricity Supply - Distribution Networks	19953

The Electricity Supply Industry Training Organisation (ESITO) has designated unit standard 19953 as expiring.

Date review report published

December 2007

Summary of review and consultation process

Unit standard 19953 was registered in July 2003. It was not listed in any qualification and no credits had ever been reported for it.

In October 2003, unit standard 20073 was registered. 20073 had the same title as 19953 and was in the same domain. 20073 was a compulsory standard in the National Certificate in Electricity Supply (Cable Jinter - Low Voltage) (Level 3) [Ref: 0869].

In retrospect, it appeared that 19953 had been registered in error. It was therefore designated expiring.

ESITO endeavoured to ascertain that no accredited organisation was using the standard.

The unit standard categorised as D is to expire at the end of December 2007.

Impact on existing provider accreditations

None.

Impact on Accreditation and Moderation Action Plan (AMAP)

None.

Impact on existing qualifications

None.

Review Categories and changes to classification, title, level, and credits

Key to review category
D Standard will expire and not be replaced

Engineering and Technology > Electricity Supply > Electricity Supply - Distribution Networks
