FIELD ENGINEERING AND TECHNOLOGY

Revision of *Electrical Engineering* unit standard 15849

Subfield	Domain	Id
Electrical Engineering	Core Electrical	15849

The ElectroTechnology Industry Training Organisation has revised the unit standard listed above.

Date new version published **January 2007**

Planned review date **May 2009 (unchanged)**

Reason for the revision

The unit standard was revised to take into account that solder lugs are no longer freely available and consequently, little used.

Main changes resulting from the revision

The element 3 range statement was amended to provide greater flexibility in the requirements for solder joints.

Impact on existing provider accreditations

None.

Impact on existing qualifications

None.
