

FIELD ENGINEERING AND TECHNOLOGY

Revision of *Electricity Supply* qualification

National Certificate in Electricity Supply (Thermal Operator) (Level 4) with strands in Thermal Operations, Combined Cycle Operations, and Geothermal Operations [Ref: 0894]

The Electricity Supply Industry Training Organisation (ESITO) has revised the qualification above.

Date new version published

June 2007

The next qualification review is planned to take place during 2011.

Reason for the revision

This revision has been undertaken in order to correct a small error in the total credit range. The opportunity was taken to simplify the expression of transition arrangements and to update the prerequisite diagram.

There were no changes made to the structure of the qualification.

Main changes resulting from the revision

- Total credit range amended from 101-134, to 103-134.
- Transition section amended to simplify the detailed listing of differences between earlier qualification versions.
- Prerequisite diagram updated.

Transition

There are no transition implications.

All existing candidates may complete previous versions of the qualification.

All new candidates will be signed on to version 4 of this qualification.
