

- Terminology within each unit standard has been brought into line with other reviewed CSSITO unit standards.
- Unit standards have been checked for clarity of wording, completeness of coverage, compliance with safety standards and current best practice. This has resulted in significant rewording and reordering, new performance criteria, and extension of the ranges to ensure the unit standards are applicable in a wider range of situations.
- Prerequisites have been removed from all reviewed unit standards.
- Elements and performance criteria of many unit standards have been changed to match the intent of titles, to improve assessability, interpretation, and to increase consistency of style across the standards.
- The level of unit standard 1836 has decreased from 4 to 3.
- Unit standard 5012 has been updated to reflect changes in the industry. It has a new title and its credit total has increased from 2 to 5.
- Unit standard 1831 has been replaced by a new unit standard 23382.
- Unit standard 5019 has been replaced by two new unit standards: 23386 and 23387. These two new unit standards have been classified to the Community Support Services domain.
- Six other new unit standards have been developed setting out skills and knowledge required by the industry.

Unit standards categorised as category C expire at the end of December 2010.
