

FIELD SERVICE SECTOR

Change of responsibility for, and Review of *Transportation of Waste and Recoverable Resources* unit standards

Subfield	Domain	Id
Commercial Road Transport	Transportation of Waste and Recoverable Resources	17159, 17226, 17228

Responsibility for the unit standards referred to above has been transferred from Tranzqual ITO to the Extractive Industries Training Organisation (EXITO). EXITO has completed the review of the unit standards listed above.

Date report published

October 2007

Reason for the review

During the development of *Hazardous and Special Waste Management* standards, it was identified that similar skills were included in the above standards. Tranzqual ITO therefore handed over responsibility for the unit standards to EXITO. EXITO then considered whether these unit standards were fit for purpose and determined that they were not. It was noted that the standards had not been used since their registration in 2000.

Main changes resulting from the review

As a result of the review unit standards 17159, 17226, and 17228 have been designated category D and will expire December 2007. There are no candidates currently enrolled in these unit standards and therefore there will no impact from the short timeframe for expiry.

Impact on existing provider accreditations

None.

Impact on Accreditation and Moderation Action Plan (AMAP)

The standards have been moved from AMAP 0092 to AMAP 0114.

Impact on existing qualifications

The following Tranzqual ITO qualification is materially affected by the changes. They have advised it will be updated when it is next reviewed.

Qualification title	Standard in the qualification
National Certificate in Transportation of Waste and Recoverable Resources (Solid Waste) with strands in Light Motor Vehicle and Heavy Motor Vehicle [Ref: 1232]	17228

Unit standards categorised as category D expire at the end of December 2007.

Review Categories and changes to classification, title, level and credits

All changes are in **bold**.

Key to review category

- A** Dates changed, but no other changes are made - the new version of the standard carries the same Id and a new version number
- B** Changes made, but the overall outcome remains the same - the new version of the standard carries the same Id and a new version number
- C** Major changes that necessitate the registration of a replacement standard with a new Id
- D** Standard will expire and not be replaced
