

FIELD PLANNING AND CONSTRUCTION**Revision and Rollover of *Concrete Roof Tiling* unit standards 1685-1692, 1694, 1698**

Subfield	Domain	Id
Construction Trades	Concrete Roof Tiling	1685-1692, 1694, 1698

The Plumbing, Gasfitting, and Drainlaying ITO Ltd has revised and rolled over the unit standards listed above.

Date new versions published

August 2008

Planned review date

April 2013

Reason for the revision

The roofing qualifications are being reviewed. Part of the review involved considering the level, credits and domain of all unit standards within the National Certificate in Roofing (Installer) with strands in Concrete Roof Tiling; Metal Roofing and Cladding; Metal Roof Tiling; Membrane Roofing; Liquid Membrane Roofing; Torch on Membrane Roofing; and Shingle Roofing; and with an optional strand as a Foreperson [Ref: 0375].

The consultation process has been undertaken as part of an overall roofing review via the roofing advisory group.

Concrete Roof Tiling level and credits

The level of the *Concrete Roof Tiling* unit standards does not reflect that a candidate is required to have developed a concrete roof tiling skill where they have complete responsibility for quantity and quality of output and are capable of applying the tasks without any direction from a supervisor. These unit standards therefore do not reflect the correct level and credits associated with the importance of the concrete roof tiling tasks and knowledge.

It is therefore proposed to increase the unit standards to Level 4 and raise the credit value to reflect the notional learning and assessment time associated with the knowledge and skill of the tasks involved.

Domain change

The Plumbing, Gasfitting and Drainlaying ITO Ltd has two domains on the National Qualifications Framework (NQF) relating to the roofing industry: *Concrete Roof Tiling* and *Roofing*, sitting under different subfields. The registered unit standards within these two domains form the basis of the registered National Certificate in Roofing (Installer) with strands [Ref: 0375].

As the qualification title indicates there are several roof types but this is not reflected in the domain names. The domain names suggest there is just roofing and concrete roof tiling.

The *Concrete Roof Tiling* domain currently has five Level 2 unit standards all of which have expired and have not been replaced; ten Level 3 unit standards three of which have expired and have not been replaced; and three Level 4 unit standards. If left as is, once the expired unit standards are removed from the NQF there will be no unit standards at Levels 1 or 2, seven at Level 3 and three at Level 4 making a total of ten unit standards. Therefore this revision includes changing the classification of the *Concrete Roof Tiling* unit standards to the *Roofing* domain.

Following the domain change the *Concrete Roof Tiling* domain will be lapsed.

Main changes resulting from the revision

- Domain changed from *Concrete Roof Tiling* to *Roofing*.
- Levels and credits have been increased for some standards to better reflect the skill, learning time, responsibility and difficulty of the tasks involved.

Impact on existing provider accreditations

Current Accreditation for			Accreditation extended to		
Nature of accreditation	Classification or Id	Level	Nature of accreditation	Classification or Id	Level
Domain	Concrete Roof Tiling	Any	Domain/Id	Roofing	Same

Impact on Accreditation and Moderation Action Plan (AMAP)

None.

Impact on existing qualifications

Qualifications that contain the reviewed standards or classifications are tabled below.

Affected	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
Not materially affected	The qualification lists a standard that has a new title The qualification lists a standard that has a new classification

The following Plumbing, Gasfitting and Drainlaying ITO Ltd qualification is affected by the outcome of this revision and is currently being reviewed.

Qualification title	Classification or standard in the qualification
National Certificate in Roofing (Installer) with strands in Concrete Roof Tiling, Metal Roofing and Cladding; Metal Roof Tiling; Membrane Roofing; Liquid Membrane Roofing; Torch on Membrane Roofing; and Shingle Roofing; and with optional strands in Translucent Roofing; and Foreperson [Ref: 0375]	1685, 1686 , 1687 , 1688, 1689 , 1690 , 1691 , 1692, 1694, 1698

Summary of main changes

All changes are in **bold**.

Construction Trades>Concrete Tile Roofing

Plumbing, Gasfitting and Drainlaying>Roofing

Id	Title	Level	Credit
1685	Carry out preliminary site check for concrete roof tiling	4	8
1686	Fix battens for concrete and clay roof tiles	3 4	5 8
1687	Fix underlay for concrete roof tiles	3 4	4 8
1688	Load concrete roof tiles onto a roof	3	5
1689	Fix full concrete roof tiles	3 4	4 8
1690	Fix part concrete roof tiles	3 4	6 10
1691	Install lead flashings to concrete roof tiles	3 4	6 8
1692	Inspect the installation of specialist flashings to concrete roof tiles	4	8
1694	Install finishes at concrete tile roof terminations	4	8
1698	Re-roof an existing concrete tile roof with concrete tiles	3 4	6 10
