Tranzqual has revised the unit standards listed above.

Date new versions published **November 2008**

Planned review date **December 2012**

Reason for the revision

Further safety standard developments within the industry have led to changes in the best practice guidelines for the transportation of logs. Consequently, the unit standards were revised to ensure that they met current industry requirements. The opportunity was also taken to correct errors and ensure that the levels and credits allocated to the unit standards were appropriate.

Main changes resulting from the revision
