FIELD COMPUTING AND INFORMATION TECHNOLOGY

Revision of *Generic Computing* unit standard 5940

Subfield	Domain	Id
Computing	Generic Computing	5940

NZQA National Qualifications Services has revised the unit standard listed above.

Date new version published **July 2009**

Planned review date **December 2013**

Reason for the revision

The standard was revised to correct the error of using 'website' in the final sentence of special note 2.

Main changes resulting from the revision

- 'Website' was replaced with 'presentation' to clarify that the brief for the presentation would be supplied to the candidate.

Impact on existing provider accreditations

None.

Impact on existing qualifications

None.
