The Joinery Industry Training Organisation has completed the review of the unit standards listed above.

Date new version of report published**March 2009****Date new versions published****January 2009****Planned review date****December 2013****Summary of review and consultation process**

The Joinery Advisory Group met on the 7-8th February 2008 to look at the joinery standards and consider the feedback generated through the assessment and moderation process. The feedback process identified seven current standards that were no longer fit for purpose and that would be designated as expiring. Areas where there were gaps were also identified and five new standards were developed. Changes to the standards were identified and endorsed in May after the amended standards had been circulated to all stakeholders for comment.

Main changes resulting from the review

- Changes in domain from *Laminate Fabrication* to *Joinery Machining and Cabinetry*, and *Core Construction* to *Stairs and Other Joinery Trade Skills*.
- Changes to titles, levels and credits.
- Changes to elements, performance criteria and ranges for clarity and consistency.
- Changes to special notes.
- Seven standards have been designated as expiring. These are 8605, 8611, 8612, 8613, and 17124 in the *Joinery Machinery* domain, and 2534 and 15755 in the *Stairs and Other Joinery Trade Skills* domain.
- Five new standards have been developed, three of which are in the *Joinery Machining* domain, one in the *Stairs and Other Joinery Trade Skills* domain, and one in the *Cabinetry* domain.

Unit standards categorised as category D expire at the end of December 2010.

Impact on existing qualifications

Qualifications that contain the reviewed standards or classifications are tabled below.

Affected	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
Not materially affected	The qualification lists a standard that has a new title The qualification lists a standard that has a new classification

The following Joinery ITO qualifications are affected by the outcome of this review and will be reviewed in 2008. Unit standards in **bold** have generated the *Affected* status.
