

Field Agriculture, Forestry and Fisheries**Review of *Aquaculture* unit standard 19776**

Subfield	Domain	ID
Seafood	Aquaculture	19776

The Seafood ITO has completed the review of the unit standard listed above.

Date new version published

April 2010

Planned review date

December 2013

Summary

The review of this unit standard was due in 2010. An advisory group of providers, workplace assessors, and industry experts was formed, and the review was undertaken in February 2010. Although the standard has not been used it has been retained because it provides recognition of the skills and knowledge needed for growing oysters in workplaces that have not switched to the single-seed spat method and Seafood ITO now has assessors with the skills required to assess against the standard. Only minor changes were made to the unit standard to align it with wording used in the most recently registered Aquaculture unit standards. The advisory group endorsed the final copy as fit for purpose.

Main changes

- Evidence required for performance criterion 1.1 has been clarified
- Reference to 'in-house requirements' has been replaced with 'company requirements' in performance criteria 1.2-1.4.

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced

Agriculture, Forestry and Fisheries > Seafood > Aquaculture
