

FIELD MANUFACTURING**Review of *Boatbuilding* qualification****National Certificate in Boatbuilding (Marine Electrical and Electronic Installation) (Level 3) [Ref: 0930]**

The NZ Marine Industry Training Organisation has completed the review of the qualification above.

Date new version published**November 2010**

The next qualification review is planned to take place during 2015.

Summary of review and consultation process

The qualification was reviewed to ensure alignment with current industry practice and requirements. The review takes into account that this certificate builds on the technical skills gained in the National Certificate in Electrical Engineering (Level 2) [Ref: 0174].

A Marine Electrical and Electronic advisory group consisting of ETITO and employers currently involved in training candidates and in workplace observation, and NZ Marine ITO assessors was formed. The group looked at fitness for purpose and suitability of current standards and content in a series of meetings and email correspondence. A wider group of stakeholders was consulted through email and discussions and represented via the advisory group members.

Main changes resulting from the review

As part of this review a number of standards have been removed and either substituted or replaced within the qualification as they are considered to be a better fit for purpose.

Some standards have been replaced as they have expired and are no longer relevant.

Changes to structure and content

- The overall credit total of the qualification increased from 69 to 83.
- Standards 4249 and 9917 have been removed.
- Standard 497 has been removed and substituted with 23244.
- Standard 6915 has been replaced by 26542.
- Standard 9915 has been replaced by 23243.
- Standard 12308 has been replaced by 20029.
- Standards 20430 and 25344 have been added.

Transition

People who are already part way through version 1 may choose to complete the requirements of that version by December 2012 or transfer their credits to version 2 of this qualification.

All new candidates will be enrolled in programmes or courses leading to the award of version 2 of the qualification.

This qualification contains standards that replace earlier standards. For the purposes of this qualification, people who have gained credit for the expiring standards are exempt from the requirement to gain credit for the replacement standards – see table below.

| Credit for | Exempt from |
|-------------------|--------------------|
| 497 | 23244 |
| 6915 | 26542 |
| 9915 | 23243 |
| 12308 | 20029 |

Any version of a unit standard contained within this qualification which retains its original unit standard identification number will continue to meet the requirements of this qualification.

Any candidate who feels that they have been disadvantaged by the transition should contact the NZ Marine Industry Training Organisation.

Key to Qualification Review Categories

| | |
|---|--|
| Category A The qualification is published as a new version with the same NQF ID | Changes are made to SSB name, contact details or purpose statement |
| | No change is made to title, rules or components of the qualification |
| | No transition arrangements are required |
| Category B The qualification is published as a new version with the same NQF ID | Changes are made to title, rules or components |
| | The new version of the qualification recognises a similar skill set to that recognised by the previous version |
| | The SSB is confident that people awarded the new or previous version are comparable in terms of competence |
| | Transition arrangements are required if candidates must gain additional/different credits for the new version |
| Category C A new (replacement) qualification is published with new NQF ID | Significant changes are made to the qualification in terms of components, structure, type or level |
| | The SSB views people with the replacement qualification as being significantly different in terms of competence from those with the replaced qualification |
| | Transition arrangements are required |
| | Transition may be limited to phase-out dates |
| Category D Qualification will expire. There is no replacement qualification | Qualification is no longer required by industry |
| | The qualification is designated as expiring and a last date for meeting the qualification requirements is set |
