FIELD

This review report was first published in November 2009 and was republished in October 2010 to correct an error in the replacement relationship between standard 21230 and standards 26019 and 26020. Standard 21230 was only replaced by standard 26020, not by a combination of standards 26019 and 26020. Standards 26019 and 26020 have been revised to reflect this replacement relationship - see separate report.

Review of *Electricity Supply - Power System Maintenance* unit standard 21230

Subfield	Domain	ld
Electricity Supply	Electricity Supply - Power	21230
	System Maintenance	

The Electricity Supply Industry Training Organisation has completed the review of the unit standard listed above.

Summary of review and consultation process

This unit standard was reviewed to ensure that it remains relevant to industry. Industry consultation determined that industry practice would be better reflected by replacing the existing unit standard with new unit standards.

Main changes resulting from the review

This unit standard was replaced by one new unit standard. In addition new level 4 and level 6 standards were created in order to staircase trainees from level 4 through to level 6.

The unit standard categorised as category C expires at the end of December 2011.

Impact on existing provider accreditations

None.

Impact on existing qualifications

Qualifications that contain the reviewed standards or classifications are tabled below.

Affected	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
Not materially affected	The qualification lists a standard that has a new title
	The qualification lists a standard that has a new classification

October 2010

December 2013

November 2009

The following Electricity Supply Industry Training Organisation qualification is affected by the outcome of this review and will be reviewed in 2010.

Qualification title	Standard in the qualification		
National Certificate in Electricity Supply (Power Technician)	21230		
(Level 5) [Ref: 1260]			

Review Categories and changes to classification, title, level, and credits

All changes are in **bold**.

Key to review category		
Α	Dates changed, but no other changes are made - the new version of the standard carries the same Id and a new	
	version number	

B Changes made, but the overall outcome remains the same - the new version of the standard carries the same Id and a new version number

C Major changes that necessitate the registration of a replacement standard with a new ld

D Standard will expire and not be replaced

Subfield Electricity Supply

Domain Electricity Supply - Power System Maintenance

ld	Title	Level	Credit	Review Category
26019	Demonstrate knowledge of introductory concepts in power system protection	4	10	New
21230	Describe advanced power system protection schemes	5	6	С
26020	Demonstrate knowledge of intermediate concepts in power system protection	5	10	
26021	Demonstrate knowledge of advanced concepts in power system protection	6	15	New
