Summary

Feedback from key training providers led to the revision of these unit standards to update explanatory note 1. The unit standards have been updated to allow off-job assessment so that providers with the machinery, equipment and capability to deliver and assess against them can do so. Where the unit standard includes production criteria, the unit standards have been amended to allow off-job assessment only where providers can meet current commercial industry practice. The updated unit standards were approved by the Furniture Sector Operating Committee.
