

**Field Health****Review of Occupational Health and Safety Practice unit standard 19341**

Subfield	Domain	ID
Occupational Health and Safety	Occupational Health and Safety Practice	19341

The New Zealand Industry Training Organisation has completed the review of the unit standard above.

**Date new version published**

**June 2011**

**Planned review date**

**December 2016**

**Summary**

This unit standard is used in highly specialised health and safety training. Some candidates undertaking this training had difficulty completing Outcome 4 of the standard because, in practice, it required drawing on experience of leading a HAZOP study, which their roles in the workplace and level of experience did not allow them to do.

The Health and Safety Advisory Group, made up of industry representatives and providers, recommended that the existing standard continue to focus on assessing knowledge of participation in HAZOP studies in the workplace and a new standard be developed to cover leading a HAZOP study in the workplace, including practical application of the skills. These changes were made and endorsed by the Health and Safety Advisory Group in January 2011.

**Main changes**

- Removal of barriers to completion of standard 19341.
- Development of a new standard to fill an identified industry gap for people leading HAZOP studies.

The last date for assessment of the superseded versions of this standard (versions 1-3) is 31 December 2013. Results will not be accepted where the assessment date is after the last date for assessment of the superseded version of the standard.

**Detailed list of unit standards – classification, title, level, and credits**

All changes are in **bold**.

<b>Key to review category</b>	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new ID
<b>D</b>	Standard will expire and not be replaced
