

Field Planning and Construction**Change of responsibility, revision, and rollover of *Architectural Aluminium Joinery* unit standards**

Subfield	Domain	ID
Construction Trades	Architectural Aluminium Joinery	550-551, 554-558, 22881-22884, 23740, 24740-24745, 25858

Responsibility for the unit standards referenced above has been transferred from Competenz to the **Joinery Industry Training Organisation**.

The Joinery Industry Training Organisation (JITO) has also revised and rolled over the unit standards listed above.

Date new versions published

May 2011

Planned review date

December 2016

Summary

On 10 March 2011, the Minister for Tertiary Education approved an application from Competenz to update its gazetted coverage statement to remove the reference to *architectural aluminium*. This change was requested because Competenz had agreed to transfer responsibility for the unit standards in the Architectural Aluminium Joinery domain to the JITO because they are more appropriate to the JITO's area of standard setting responsibility.

This change of responsibility was supported by the Windows Association of New Zealand which represents a significant part of the Architectural Aluminium Window Joinery industry.

These unit standards have also been revised, rolled over, and updated to meet industry requirements

Main changes

- The entry requirements, explanatory notes, evidence requirements, and range statements were updated to meet industry requirements.
- All of these unit standards now have a planned review date of 2016.

Impact on Consent and Moderation Requirements (CMR)

These unit standards were transferred from CMR 0013 to CMR 0073.
