Field   Sciences

Review and change of responsibility of *Home and Life Sciences* unit standards

Subfield	Domain	ID
Home and Life Sciences	Home and Life Sciences - Textile Technology	6677, 6685-6697, 6698-6704, 16835-16838, 16839-16841

The NZQA National Qualifications Services has completed the review of the unit standards listed above.

Date new versions published   August 2012

Planned review date   December 2014

Summary

In 2008, NZQA began to review unit standards in light of the Alignment of Standards (AoS) review. The review of unit standards included consultation with tertiary providers and Industry Training Organisations (ITOs) to assess continued relevance and likely future use of the standards. Unit standards that duplicated achievement standard outcomes and those without the likelihood of future tertiary use were recommended for expiry.

Home and Life Sciences - Textile Technology unit standards at Levels 2-4 have significant usage, including by tertiary providers. It was determined that twenty-one of the unit standards in this domain were industry specific and therefore outside NZQA's standard setting coverage. The remaining seven unit standards were determined to be neither industry specific nor in alignment with the New Zealand Curriculum and so were recommended for expiry.

Following a formal request from the Apparel and Textile Industry Training Organisation (ATITO), it was determined that the twenty industry specific unit standards in domain *Home and Life Sciences – Textile Technology* came under ATITO's industry coverage and did not duplicate outcomes in draft or registered achievement standards. It was agreed that standard setting responsibility for the indentified unit standards at Levels 2-4 would be transferred from NZQA to ATITO. However, in on 4 May 2012 that coverage was extended to Plastics and Materials Processing Industry Training Organisation Incorporated (PaMPITO).

Main changes

- Standard setting responsibility for twenty unit standards at Levels 2-4 in domain *Home and Life Sciences – Textile Technology* was transferred to PaMPITO. The remaining unit standards in this domain were designated as expiring.
- The removal of references to the New Zealand Curriculum related documents and expiring Level 1 standards.

Category D unit standards will expire at the end of December 2013

Impact on Consent and Moderation Requirements (CMR)

Transferred unit standards in domain *Home and Life Sciences – Textile Technology* have

been registered on PaMPITO's CMR 0134.

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced
