The Building and Construction Industry Training Organisation (BCITO) has completed the review of the unit standards listed above.

**Date new versions published**

**October 2014**

**Planned review date**

**December 2018**

**Summary**

As a result of their TRoQ process, BCITO has reviewed the listed unit standards to better reflect the requirements of the outcomes listed in the new qualifications. This process has resulted in 21 new unit standards replacing 64 expiring unit standards. A further three unit standards have been developed to fill identified gaps. Four unit standards were designated as expiring as they are no longer fit for purpose and 14 unit standards were reviewed to bring them up to technical and industry specifications. As a result of the evaluation of the new qualifications two new domains were identified and registered. Existing and new unit standards have been allocated into these new domains. These changes were endorsed by both industry and providers in November 2013.

**Main changes**

New domains *Joinery Core Skills* and *Joinery Operational Skills* were created to replace the *Cabinetry*, *Door and Window Joinery*, *Joinery Machining*, *Laminate Fabrication*, and *Stairs and Other Joinery Trade Skills* domains. New and reviewed standards were registered in the new domains.

**Category C and D unit standards will expire at the end of December 2016**

### Impact on Consent and Moderation Requirements (CMR)

None.

### Impact on registered qualifications

Key to type of impact	
<b>Affected</b>	The qualification lists a reviewed classification (domain or subfield) in an elective set The qualification lists a standard that has changes to level or credits The qualification lists a C or D category standard
<b>Not materially affected</b>	The qualification lists a standard that has a new title The qualification lists a standard that has a new classification

The following Building and Construction Industry Training Organisation (BCITO) qualifications are impacted by the outcome of this review. These qualifications are part of the current sector review of Construction qualifications that began in 2013. The standards that generated the status *Affected* are listed in **bold**.
