Planned review date

December 2019

Summary

The review of these unit standards were initiated through their scheduled review and the Targeted Review of Qualifications (TRoQ) for Environment Māori qualifications.

The unit standards were reviewed to ensure that they are fit for purpose and relevant. The titles, purpose statements, explanatory notes, outcomes, evidence requirements and range statements in the unit standards have been amended to reflect this and to ensure clarity for users.

The unit standards were reviewed by Whakaruruhau over four hui held in 2014 and 2015. All amendments to the standards were endorsed by stakeholders and the Whenua and Environment Māori Whakaruruhau.

The last date for assessment of superseded versions of the reviewed standards is 31 December 2017. Results will not be accepted where the assessment date is after the last date for assessment of superseded versions of the standard.

Unit standard 16367 expired in the last review and in this review unit standard 16370 has been designated as expiring. The whakaruruhau have combined the two standards and developed a new standard 29233.

Main changes

- Unit standard 16370 is designated as expiring in December 2016.
- One new standard has been developed.
- The titles of unit standards 16377, 19531, 19535, 15992, 27134, 27136 and 27139 have been changed to better reflect the unit standard outcomes.
- Unit standards 19531 and 19535 and 15992 have been amended to include native freshwater shellfish and marine shellfish.

- Grammar errors have been amended.
- Changes in levels and/or credit values were made to unit standards 6145, 15974, 15975, 25476 and 27134.
- Four unit standards transferred from CMR 0166 to CMR 0226

Category D unit standards will expire at the end of December 2016
