

Field Engineering and Technology**Revision of *Vehicle Bodywork* unit standard 21709**

Subfield	Domain	ID
Motor Industry	Vehicle Bodywork	21709

MITO New Zealand Incorporated has completed the review of the unit standard listed above.

Date new version published

November 2016

Planned review date

**December 2021
(unchanged)**

Summary

As a result of work carried out by MITO on the Targeted Review of Qualifications, it was decided to revise unit standard 21709 to ensure it meets industry requirements and does not create barriers for learners.

Main changes

- The credit value was raised by one to better reflect the time taken to achieve the requirements of this unit standard.
- Entry information was updated.
- Changes were made to the range statement listed under explanatory notes, and one evidence requirement was deleted to remove barriers for learner achievement.
- Ranges listed under evidence requirements were deleted as they are unnecessary given that the task undertaken already dictates the requirements.

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.
