

**Field Agriculture, Forestry and Fisheries**Revision of *Production Horticulture* unit standard 29924

<b>Subfield</b>	<b>Domain</b>	<b>ID</b>
Horticulture	Production Horticulture	29924

The Primary ITO has completed the revision of the unit standard listed above.

**Date new version published** **July 2017**

**Planned review date** **December 2022**

**Summary**

The Primary ITO has revised unit standard 29924. The change allows the learner to either develop a maintenance schedule or cleaning procedure depending on their area of responsibility. This is a cross-sector assessment standard so at present the current wording would create a completion barrier for some learners.

It's important the learner can develop either a maintenance schedule or cleaning procedure which is in context to their area of responsibility.

**Main changes**

- Minor changes were made to the wording of outcome 3 which allows learners to develop either a maintenance schedule or cleaning procedures depending on their post-harvest operation.
