Review of *Electricity Supply* qualification

**National Certificate in Electricity Supply (Line Mechanic Distribution) (Level 4)
[Ref: 0874]**

The Infrastructure Industry Training Organisation has completed the review of the qualification above.

Date new version published

June 2017

Main changes resulting from the review

- The Last Date of Assessment was extended from 31 December 2016 to 31 December 2017.
- DAS exemptions were included for expired unit standards 10518, 12298, 16278.

Transition

The last date for entry into programmes leading to this qualification has passed. No new enrolments can be accepted.

All existing trainees must complete this qualification by the 31 December 2017 or transfer their results to the replacement qualification.

It is anticipated that no existing candidates will be disadvantaged by these transition arrangements. However, anyone who feels that they have been disadvantaged may appeal to ITO at the address below.

Appeals will be considered on a case by case basis.

Key to Qualification Review Categories

Category A The qualification is published as a new version with the same NQF ID	Changes are made to SSB name, contact details or purpose statement
	No change is made to title, rules or components of the qualification
	No transition arrangements are required
Category B The qualification is published as a new version with the same NQF ID	Changes are made to title, rules or components
	The new version of the qualification recognises a similar skill set to that recognised by the previous version
	The SSB is confident that people awarded the new or previous version are comparable in terms of competence
	Transition arrangements are required if candidates must gain additional/different credits for the new version
Category C A new (replacement) qualification is published with new NQF ID	Significant changes are made to the qualification in terms of components, structure, type or level
	The SSB views people with the replacement qualification as being significantly different in terms of competence from those with the replaced qualification
	Transition arrangements are required
	Transition may be limited to phase-out dates
Category D Qualification will expire. There is no replacement qualification	Qualification is no longer required by industry
	The qualification is designated as expiring and a last date for meeting the qualification requirements is set
