

**Field      Engineering and Technology****Review of *Electricity Supply* unit standards**

<b>Subfield</b>	<b>Domain</b>	<b>ID</b>
Electricity Supply	Electricity Supply - Power System Maintenance	14700
	Electricity Supply - Power Systems Management	16275, 16279

Infrastructure ITO (Connexis) has reviewed the unit standards listed above.

**Date new versions published**

**September 2017**

**Planned review date**

**December 2022**

**Summary**

The review of these unit standards was initiated during the review of the operator qualifications when the relevance and completion of the network operator, hydro operator, and thermal operator needs were considered by industry stakeholders. The outcomes from the unit standards have been reviewed and amendments made to meet the requirements of the network operator in the electricity supply industry.

**Main changes**

- Unit standards 14700 and 16279 were reviewed with minor changes.
- Unit 16275 was replaced by a new standard in network load management.
- Two new unit standards were developed.

**The Category C unit standard will expire at the end of December 2019**

**The last date for assessment of superseded versions of Category B unit standards is December 2019**

**Detailed list of unit standards – classification, title, level, and credits**

All changes are in **bold**.

<b>Key to review category</b>	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new ID
<b>D</b>	Standard will expire and not be replaced
