

Field Manufacturing**Review, reinstatement and reclassification of Dairy Manufacturing unit standards**

Subfield	Domain	ID
Dairy Processing	Dairy Product Safety and Risk Management	25676
	Dairy Technology	758, 760, 19526, 19529, 19968

The Primary ITO has completed the review, reinstatement and reclassification of the unit standards listed above.

Date new versions published

December 2019

Planned review date

December 2024

Summary

The above unit standards were originally reviewed and set to expire as part of the wider Dairy Manufacturing review in 2015. This decision has since been revisited by industry experts, in order to provide trainees with the essential skills required as dairy processing operators to diagnose electrical and mechanical faults, and provide solutions.

Main changes

- Six unit standards were reinstated, reclassified and updated into the current template
- Content was reviewed for currency and updated as appropriate.

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced

Manufacturing > Dairy Manufacturing > Dairy Product Safety and Risk Management
