Field Manufacturing

Review and reinstatement of Animal Product Examination unit standards

Subfield	Domain	ID
Meat Processing	Animal Product Examination	22047, 22050

The Primary ITO has completed the review and reinstatement of the unit standards listed above.

Date new versions published

December 2020

Planned review date

December 2025

Summary

The unit standards listed above were inadvertently expired following a review of Animal Product Examination unit standards in 2016. The Animal Products Act 1999 requires Nominated Persons in poultry processing plants to complete these unit standards. These unit standards have been reinstated to meet this legislative requirement.

Main changes

- Unit standards were reinstated from expired.
- A new outcome was added to the reinstated version of unit 22047 to include identification of poultry disease.
- The title for the reinstated version of unit 22050 was amended to better reflect the content.
- Minor changes were made to content of reinstated versions to meet NZQA current technical requirements.

Ke	Key to review category				
Α	Dates changed, but no other changes are made - the new version of the standard carries the				
	same ID and a new version number				
В	Changes made, but the overall outcome remains the same - the new version of the standard				
	carries the same ID and a new version number				
С	Major changes that necessitate the registration of a replacement standard with a new ID				
D	Standard will expire and not be replaced				

Detailed list of unit standards - classification, title, level, and credits

All changes are in **bold**.
