Review of *Extractive Industries* and *Metalliferous Mining* standards

Subfield	Domain	ID
Extractive Industries	Extractive Industries Management	24469, 28739-28741, 28983
Metalliferous Mining	Metalliferous Mining - Operations	24477

MITO New Zealand Incorporated has completed the review of the unit standards listed above, which are coversheets for Australian Units of Competency

Date new versions published

January 2021

Planned review date

December 2025

Summary

MITO undertook the scheduled five-year review of several Extractives and Metalliferous Mining units. These units are all for the New Zealand registered versions of Australian Units of Competency. Unit 24477 was set to expire as this unit no longer aligns with the needs of industry.

These standards were circulated to the working group's networks and organisations with consent to assess and a consultation period was held. Feedback received was actioned where appropriate.

Main changes

- Unit 24477 was set to expire without replacement due to a lack of usage.
- Titles of units 28739 and 28740 were amended in line with the Australian Units of Competency.
- The Australian Qualifications Framework Developer and Memorandum of Understanding holder with MITO was updated to PwC's Skills for Australia (the Australian Skills Service Organisation for the Mining, Drilling and Civil Infrastructure industry sector). References, legislation and Australian Units of Competency reference numbers were updated.
- Purpose statements for units were updated to reflect changes made to the Australian Units of Competency.
- Units were shifted from CMR 0114 to CMR 0014.

The Category D unit standard will expire at the end of December 2023

The last date for assessment of superseded versions of Category B unit standards is December 2023

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced

Engineering and Technology > Extractive Industries > Extractive Industries Management

ID	Title	Level	Credit	Review Category
24469	Apply risk management processes at an extractive site	4	5	B
