	Electricity Supply - Distribution Networks	28494

Connexis has completed the revision of the unit standards listed above.

Date new versions published

January 2021

Planned review date

**December 2024 or 2025
(unchanged)**

Summary

Connexis identified range statements in these five unit standards which required amendment, either because the range no longer reflected current practice or the range needed clarification.

Main changes

- Ranges were amended to align to current practice or added for clarity.
- Minor changes were made to the guidance information to align to the wording of other unit standards in this subfield.
