

Subfield Rail Transport

Revision of *Rail Operations* unit standard

Subfield	Domain	ID
Rail Transport	Rail Operations	19387

Competenz has completed the revision of the unit standard listed above.

Date new versions published December 2021

Planned review date December 2025

Summary

Following the review of Rail Operations unit standards in early 2021, additional feedback was received from Kiwirail, the only user of this unit standard, that assessment note 5.d in the Guidance Information was not achievable or assessable in practice as there are no available freight trains with 'primarily empty vehicles' for assessment. In addition, dynamic braking and adapting to differing loading conditions is sufficiently assessed in performance criteria 2.3 and 3.3. For these reasons, assessment note 5.d in the Guidance Information was removed from unit standard 19387.

Main changes

- Assessment note 5.d in the Guidance Information was removed from standard 19387.
