

Field Engineering and Technology

Revision of *Aeronautical Engineering* unit standard 32133

Subfield	Domain	ID
Aeronautical Engineering	Aerospace Engineering	32133

Ringa Hora Services Workforce Development Council has completed the revision of the unit standard listed above.

Date new version published

November 2022

Planned review date (no change)

December 2025

Summary

This unit standard was revised to change the ranges in the performance criteria. These changes will ensure that the standard is more flexible when more launch providers enter the market. Furthermore, it will future-proof the standard if new technologies or techniques come into use and some items in the current ranges are not relevant to the only workplace currently looking to use this standard.

Main changes

- Range statements for performance criteria were changed to “may include but is not limited to”.
- The standard setting body details were updated to Ringa Hora Services Workforce Development Council.
