

## Field      Service Sector

### Review and expiry of *Lifting Equipment* unit standards

Subfield	Domain	ID
Lifting Equipment	Rigging	20259, 25318
	Scaffolding	23230

Waihangā Ara Rau Construction and Infrastructure Workforce Development Council has completed the review of the unit standards listed above.

### Summary

The review was undertaken because the standards were overdue for updating and some had no recent usage.

Consultation was conducted with providers who have consent to assess and the peak body Scaffolding, Access & Rigging NZ (SARNZ).

A summary of the feedback from the consultation concluded that:

- 20259 content is now included in four current unit standards in the Core Rigging domain, (4212, 4313, 4214, 4215).
- 23230 content is integrated into current unit standards, 19620 and 19621.
- 20259 and 25318 are no longer being used and providers had no objection to the unit standards being expired.
- Providers and SARNZ have no objection to expiring 23230 so there is no further use for it. This is the only remaining unit standard in the expiring *Scaffolding* domain.

In response to feedback Waihangā Ara Rau recommend that 20259, 25318 and 23230 be expired.

### Main changes

- 20259, 23230 and 25318 are expiring due to low or no recent usage.

### Category D unit standards will expire at the end of December 2023

### Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new ID
<b>D</b>	Standard will expire and not be replaced

Service Sector > Lifting Equipment > Rigging
