**Review of *Roadmarking* unit standards**

<b>Subfield</b>	<b>Domain</b>	<b>ID</b>
Infrastructure Works	Roadmarking	18043, 18054, 21424

Waihanga Ara Rau Construction and Infrastructure Workforce Development Council has completed the review of the unit standards listed above.

**Date new versions published**

**June 2023**

**Planned review date**

**December 2028**

**Summary**

Waihanga Ara Rau Construction and Infrastructure Workforce Development Council reviewed 3 *Roadmarking* standards from the Infrastructure Works subfield to update guidance information and check for industry relevance.

The Technical Advisory Group was made up of representatives from the New Zealand Road Marking Federation, large and small road marking businesses, and Connexis Work Based Learning, Te Pukenga. The Technical Advisory Group agreed with the inclusion of a reference to the recently updated NZ Road Marking Federation Trouble Shooting Guide. Other minor changes to performance criteria were made.

**Main changes**

- The guidance information was updated to include references and links to up-to-date legislation, practice guidelines and industry standards.
- The Standard Setting Body details were changed from Infrastructure ITO to Waihanga Ara Rau Construction and Infrastructure Workforce Development Council.
- Performance criterion 1.2 of unit standard 18054 has been rewritten and simplified to include a wider range of products. Specific product names have been removed to prevent the need to update this PC as new products come onto the market.
- Minor changes have also been made to performance criteria 1.1, 1.2 and 1.4 of unit standard 21424.

**The last date for assessment of superseded versions of Category B unit standards is 31 December 2025.**

**Detailed list of unit standards – classification, title, level, and credits**

All changes are in **bold**.

<b>Key to review category</b>	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new ID
<b>D</b>	Standard will expire and not be replaced
