

Field Planning and Construction

Review of *Core Construction* unit standard 2138

Subfield	Domain	ID
Construction Trades	Core Construction	2138

Waihanga Ara Rau Construction and Infrastructure Workforce Development Council has completed the review of the unit standard listed above.

Date new version published

April 2024

Planned review date

December 2028

Summary

This review was undertaken by Waihanga Ara Rau in collaboration with the Toitū te Waioira review of other asbestos unit standards. Consultation with providers, industry association and various tertiary education organisations (TEO) occurred from August 2022 to December 2023. Consultation included one-on-one and small group meetings, email, and online meetings. Feedback was collated, analysed, and actioned. The final drafts were supported by all interested parties.

Main changes

- Iterative changes were made to Guidance Information text to define ACM, friable and non-friable asbestos and to update to the current versions of references and potential range of asbestos in construction products.
- Outcome 2 was updated.
- Performance Criteria (PC) were updated to include a range for where asbestos is likely to be found in the construction industry, a range to clarify expectations for descriptions of ACM, and to describe friable and non-friable asbestos.
- A new PC was added to Outcome 2 to include a description of the procedure to follow when asbestos is identified on a worksite.

The last date for assessment of superseded versions of Category B unit standards is 31 December 2025.

Detailed list of unit standards – classification, title, level, and credits

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced
