Ringa Hora Services Workforce Development Council has completed a rollover and revision of the unit standards listed above.

**Date new versions published**

**April 2024**

**Planned review date**

**December 2027**

**Summary**

Ringa Hora Services Workforce Development Council, in consultation with stakeholders, has revised and rolled over fifty Aeronautical Engineering unit standards. This will form part of several applications due to the number of unit standards going through the same maintenance process.

The sector has confirmed that these standards are still fit for purpose, and with skill standards being developed to align with the Aeronautical Engineering suite of qualifications due for review by December 2027, agreed there is little benefit in making significant changes to these unit standards at this time.

**Main changes**

- Unit standard 28038 had a change made to Outcome 2 to align with the performance criteria.
- Unit standard 28032 had changes made to performance criteria 1.2, 1.3 and 3.5.
- The planned review date was extended from 31 December 2024 to 31 December 2027.
- Standard setting body information was updated from ServiceIQ to Ringa Hora Services Workforce Development Council.
