

Rollover and Revision of *Aeronautical Engineering* unit standards Part Two

Subfield	Domain	ID
Aeronautical Engineering	Aeronautical Composites	4020, 4021, 4023, 4024, 23601
	Aeronautical Machining	4025, 4027-4031, 4034, 4066, 29135
	Aircraft Mechanical Maintenance	3918-3922, 3924-3928, 7243, 7244, 20632, 20633, 28144, 30695
	Aircraft Structures	4026, 4032, 4033, 4067-4073, 4075-4083, 23653, 28033, 28036, 28139, 28140

Ringa Hora Services Workforce Development Council has completed a rollover and revision of the unit standards listed above.

Date new versions published

April 2024

Planned review date

December 2027

Summary

Ringa Hora Services Workforce Development Council, in consultation with stakeholders, has revised and rolled over fifty-four Aeronautical Engineering unit standards.

This will form part of several applications due to the number of unit standards going through the same maintenance process.

The opportunity was taken to carry out amendments for consistency of formatting styles and wording of unit standards within the domains, correct a numbering error, and to correct a spelling error.

The sector has confirmed that these standards are still fit for purpose, and with skill standards being developed to align with the Aeronautical Engineering suite of qualifications due for review by December 2027, agreed there is little benefit in making significant changes to these unit standards at this time.

Main changes

- Unit standards 3920, 3921, 3927, 4023, 4025, 4026, 4028, 4034, 4075, 20633, 28033, 28036, 28139, and 28140 have all received minor amendments for consistency.
- The planned review date was extended from 31 December 2024 to 31 December 2027.
- Standard setting body information was updated from ServiceIQ to Ringa Hora Services Workforce Development Council.
