

Field Engineering and Technology

Rollover and Revision of *Avionic Maintenance* unit standards

Subfield	Domain	ID
Aeronautical Engineering	Avionic Maintenance	3943-3945, 3948, 4022, 22509-22518, 22520-22545, 22928, 30701, 30702

Ringa Hora Services Workforce Development Council has completed a rollover and revision of the unit standards listed above.

Date new versions published

June 2024

Planned review date

December 2027

Summary

Ringa Hora Services Workforce Development Council, in consultation with stakeholders, has revised and rolled over forty-four Aeronautical Engineering unit standards.

This will form part of several applications due to the number of unit standards going through the same maintenance process.

The opportunity was taken to carry out amendments for consistency of formatting styles and wording of unit standards within the domain.

The sector has confirmed that these standards are still fit for purpose, and with skill standards being developed to align with the Aeronautical Engineering suite of qualifications due for review by December 2027, agreed there is little benefit in making significant changes to these unit standards at this time.

Main changes

- Unit standards 3944, 4022, 22515, 22516, 22517, 22928, 30701, and 30702 have all received minor amendments for consistency.
- The planned review date was extended to 31 December 2027.
- Standard setting body information was updated from ServiceIQ to Ringa Hora Services Workforce Development Council.
