

Field Engineering and Technology

Revision of *Temporary Traffic Management* unit standards

Subfield	Domain	ID
Infrastructure Works	Temporary Traffic Management	31957-31963

Waihanga Ara Rau Construction and Infrastructure Workforce Development Council has completed the revision of the unit standards listed above.

Date new versions published

October 2024

Planned review date

December 2024

Summary

The review of temporary traffic management unit standards was initiated by Waka Kotahi NZ Transport Agency who will be turning off the warrant system and retiring the Code of Practice for Temporary Traffic Management (CoPTTM). The Temporary Traffic Management (TTM) Industry Steering Group and providers with consent to assess support this change as the industry moves toward a risk-based approach to TTM.

References to Waka Kotahi, Connexis, and CoPTTM will be removed from the revised unit standards listed above, however, they are still fit for purpose as they meet the outcome requirements. The last date for assessment for the superseded versions is set to December 2026 to allow current learners to complete their assessments and in preparation for the expiry of these unit standards.

New skill standards for the TTM industry are being developed to align to the new risk-based approach, and the TTM credentials framework.

Main changes

- The last date for assessment for the superseded versions is set to 31 December 2026.
- Unit standards 31959-31963 were amended to remove pre-requisites.
- References to Waka Kotahi, Connexis, and CoPTTM were removed from the new versions.
- Titles for unit standards 31962 and 31963 were revised to remove the reference to CoPTTM.
- Standard setting body information was changed from Connexis to Waihanga Ara Rau in the new versions.

Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Engineering and Technology > Infrastructure Works > Temporary Traffic Management

ID	Title	Level	Credit
