

## Field      Manufacturing

### Reinstatement and review of *Marine Sales and Services* unit standards

Subfield	Domain	ID
Boating Industries	Marine Sales and Services	<b>9913</b> , 9917

The Hanga-Aro-Rau Manufacturing, Engineering and Logistics Workforce Development Council has completed the reinstatement and review of the unit standards listed above. The unit standard that has been reinstated is listed in **bold**.

**Date new versions published**

**January 2025**

**Planned review date**

**December 2029**

### Summary

This review was undertaken partly due to the request in early October 2024 from Ports Industry Association and MAST Academy to re-instate unit standard 9913, which will be included in the Gateway program from 2025. The Technical Working Group, consisting of schools participating in the gateway program and MAST Academy Transition Advisors, was set up to review unit standard 9913 together with the only other unit standard still active, 9917, as it was overdue for a mandatory review.

### Main changes

- Unit standards were moved from the *Marine Sales and Services* domain to the more appropriate *Boatbuilding* domain.
- Unit standard 9913 was reinstated.
- Outcome statements in unit standard 9913 were updated to reflect current industry requirements.
- Performance criteria were updated to reflect current practices in the industry sector and were written in the active voice.
- The term *boat building* in the title and outcomes of unit standard 9917 was amended to *boatbuilding* to align with the domain name.
- Standard setting body was changed from New Zealand Marine and Composites Industry Training Organisation to Hanga-Aro-Rau Manufacturing, Engineering and Logistics Workforce Development Council.

**The last date for assessment of superseded versions of Category B unit standards is December 2027**

### Detailed list of unit standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
<b>A</b>	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
<b>B</b>	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
<b>C</b>	Major changes that necessitate the registration of a replacement standard with a new ID
<b>D</b>	Standard will expire and not be replaced
