

Field Sciences

Review of *Ecological Management* standards

Subfield	Domain	ID
Environment	Ecological Management	20427, 20668

Toi Mai Workforce Development Council has completed the review of the standards listed above.

Date new versions published

January 2025

Summary

Standards 20427 and 20668 in the *Ecological Management* domain were overdue for review. These standards have had very low usage, and consultation showed they are no longer relevant to industry.

Initial consultation was carried out with members of the conservation advisory group convened in October to develop new micro-credentials and skill standards for conservation. Wider sector consultation was then undertaken during October and November via the Toi Mai website and mailing lists.

Main changes

- Both standards will expire without replacement.

Category D standards will expire at the end of December 2026

Detailed list of standards – classification, title, level, and credits

All changes are in **bold**.

Key to review category	
A	Dates changed, but no other changes are made - the new version of the standard carries the same ID and a new version number
B	Changes made, but the overall outcome remains the same - the new version of the standard carries the same ID and a new version number
C	Major changes that necessitate the registration of a replacement standard with a new ID
D	Standard will expire and not be replaced
