Republished qualification

Ref	Version	Qualification Title	Credits
2907	2	New Zealand Diploma in Aeronautical Maintenance Certification (Level 6) with strands in Aeroplane, Rotorcraft, Powerplant Piston, Powerplant Turbine, Electrical, Instrument, and Radio	240

Republication information

Qualification Developer	Transport Industry Skills Board
Reason for the republication	To extend the last date for assessment of superseded version
Review date	March 2026
Outcome date	30 April 2026
Next review date	31 December 2027

Summary of republication

At the request of an Education Provider, an extension to the last date for assessment of the New Zealand Diploma in Aeronautical Maintenance Certification has been made to superseded version 1.

This extension is essential to support learners currently progressing through the qualification and to allow the provider with sufficient time to complete the implementation of an updated programme.

Main changes resulting from republication

The last date for assessment of version 1 has been extended from 31 December 2026 to 31 December 2027.

The qualification developer details were updated from Ringa Hora Workforce Development Council to the Transport Industry Skills Board.

Reference to the Civil Aviation Act 1990 has been updated to the Civil Aviation Act 2023 in Strategic Purpose statement.

Any additional information, including Qualification Developer contact details.

It is the intention of the Transport Industry Skills Board that no existing trainee should be disadvantaged by these transition arrangements.

Any person who considers they have been disadvantaged may appeal to:
