Republication of *Locksmithing* New Zealand Qualification

Republished qualification

Ref	Version	Qualification Title	Credits
2718	2	New Zealand Certificate in Locksmithing (Trade) (Level 4)	210

Republication information

Qualification Developer	Manufacturing and Engineering Industry Skills Board
Reason for the republication	Extension of last date for assessment for superseded version
Republication date	May 2026
Outcome date	May 2026
Next review date	December 2025

Summary of republication process

An extension to the Last Date for Assessment (LDA) of superseded version 1 of the *New Zealand Certificate in Locksmithing (Trade)* is required to support the provision and completion of workplace-based New Zealand Apprenticeships.

The Manufacturing and Engineering Industry Skills Board (ISB) confirms that superseded version 1 remains fit for purpose and continues to meet current industry requirements for existing learners until they complete the apprenticeships.

The LDA extension supports an orderly transition to later versions of the qualification and will provide sufficient time for programme development and implementation.

The review of the qualification and associated standards included national consultation with industry and both the qualification and standards are currently in evaluation with NZQA. Education providers intending to deliver the qualification have confirmed their intention to transition to version 3 once the current qualification review is finalised, and version 3 is listed.

No further extensions will be considered.

Main changes resulting from the republication process

Version 2 of the qualification was republished.

The last date of assessment of superseded version 1 was extended from 31 December 2028 to 31 December 2029.

The Standard Setting Body (SSB) details were updated from Hanga-Aro-Rau Manufacturing, Engineering and Logistics Workforce Development Council to the Manufacturing and Engineering Industry Skills Board.
