### Guidance Information

#### Definitions

*Design brief* refers to a documented design description of a client's requirements.

*Design principles* referred to in this unit standard incorporate ergonomics, functionality, practicality, scantlings, aesthetics, and design rules.

---

### Outcomes and performance criteria

#### Outcome 1

Identify marine design requirements.

#### Performance criteria

- 1.1 The design brief is matched to the type and use of interior and exterior styling.
- 1.2 Developed design is produced incorporating structural requirements and accepted design principles.

#### Outcome 2

Design interior and exterior marine styling.

#### Performance criteria

- 2.1 Developed design matches design brief and client's requirements.
- 2.2 Structural and functional viability meets design principles.
- 2.3 Design drawings are produced that meet design brief and client's requirements.

**Outcome 3**

Coordinate the design with the work of other specialist designers.

**Performance criteria**

- 3.1 Design brief is analysed to determine required specialist input.
- 3.2 Summary specifications are prepared for project outline's critical path where specialists' input is specified.
- 3.3 Specialists' input is monitored to ensure that work meets specified design brief.

**Outcome 4**

Produce legal documents for marine contracts.

**Performance criteria**

- 4.1 Drawing, details, and specifications are collated to produce a contract set that meets client's and architect's requirements.

**This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.**

**Status information and last date for assessment for superseded versions**
