<b>Classification</b>	Aviation > Airport Operations
-----------------------	-------------------------------

<b>Available grade</b>	Achieved
------------------------	----------

### Guidance Information

- 1 Definitions  
The term *airport* refers to aerodrome as per Civil Aviation Rules.  
*Wildlife attractants* refers to food, shelter, safety, rest.
- 2 Reference to *enterprise procedures* means that all activities must comply with the requirements contained in the current airport exposition, current airport company manuals and procedures, and any relevant legislative and/or regulatory requirements, which may include but are not limited to: Civil Aviation Act 1990, relevant Civil Aviation Rules, New Zealand Defence Force (NZDF) Policy, Arms Act 1983, and the Arms Regulations 1992.

### Outcomes and performance criteria

#### Outcome 1

Demonstrate knowledge of wildlife attractants affecting an airport.

#### Performance criteria

- 1.1 Dietary preferences of wildlife commonly found at airports are identified.  
  
Range may include but is not limited to – garbage, earthworms, insects, seed, rodents, carrion, marine life, rabbits, vegetation.

- 1.2 Effects of environmental influences on wildlife movements are identified in terms of their effects on the airport environment.
- 1.3 Features of airport environments attractive to wildlife for shelter and safety are identified.
- 1.4 The causes of wildlife occupation at airports are identified, and the potential impact of causes or occupation on the airport environment is described.

## **Outcome 2**

Demonstrate knowledge of, and evaluate techniques for, the measurement and control of the concentration of wildlife food sources at an airport.

### **Performance criteria**

- 2.1 Refuse dumps and effluent disposal sites are evaluated in accordance with enterprise procedures.
- 2.2 Insect density measurement and control techniques are explained in accordance with enterprise procedures.
- Range may include but is not limited to – crickets, worms, grasshoppers, caterpillars, bugs, beetles, moths; evidence of five is required.

## **Outcome 3**

Demonstrate knowledge of the management of the wildlife environment of an airport.

Range wildlife may include but is not limited to – birds, mammals.

### **Performance criteria**

- 3.1 Operations required for minimising wildlife shelter, safety, nesting, and rest sites are described in accordance with enterprise procedures.
- 3.2 Grass and vegetation control measures are explained in terms of the effect on the airport wildlife environment.
- 3.3 Drainage systems and standing water control measures are explained in terms of the effect on the airport wildlife environment.

## **Outcome 4**

Demonstrate knowledge of gathering and reporting information on the presence of wildlife at an airport.

### **Performance criteria**

- 4.1 Methods used to monitor the level of wildlife presence are described in terms of the effect on the airport environment.

- 4.2 Techniques for continuous liaison with the Air Traffic Services, if applicable, are identified in accordance with enterprise procedures.
- 4.3 Wildlife hazard reporting requirements are described in accordance with enterprise procedures.

**Outcome 5**

Demonstrate knowledge of methods for dispersal of bird hazards at an airport.

Range may include but is not limited to – gas cannons and bottles, bird alarms, predator balloons, Mylar flags, firearms with blank ammunition; evidence of five is required.

**Performance criteria**

- 5.1 Dispersal methods relevant to most common hazard from wildlife are described in accordance with enterprise procedures.
- 5.2 The operation of dispersal methods is described in accordance with enterprise procedures.
- 5.3 The use of firearms and explosives for the dispersal of wildlife hazards at an airport are described in accordance with enterprise procedures.

**Outcome 6**

Demonstrate knowledge of the use of firearms and explosives used in the management of wildlife hazards at an airport.

**Performance criteria**

- 6.1 Storage, handling, and cleaning requirements for firearms are described in accordance with legislation and enterprise procedures.
- 6.2 The use of live ammunition in the management of wildlife hazards at an airport is described in accordance with enterprise procedures.
- 6.3 Storage and handling techniques for live ammunition are described in accordance with legislation and enterprise procedures.
- 6.4 Storage and handling techniques for explosives are described in accordance with legislation and enterprise procedures.

<b>Replacement information</b>	This unit standard was replaced by skill standard 41092.
