Guidance Information

- 1 Definitions

Company procedures refers to the documented procedures for the machine and/or worksite.

Maintenance refers to the following operations as appropriate to the specific equipment: clean, check condition, check operation, replace consumables, adjust, waterproof, and lubricate.

Repair refers to rectify defects, and can include the replacement of parts and modification of the equipment.
- 2 Evidence of the elements of this unit standard must be presented across the following contexts:
 - a equipment for both repair and maintenance – wet weather gear, man overboard equipment, signalling devices (other than radios), non-inflatable buoyancy aids, non-inflatable life rafts, hydrostatic releases, thermal protective equipment. Evidence is required for wet weather gear, man overboard equipment, signalling devices (other than radios), plus one further example.
 - b equipment for maintenance only: fire protection equipment, emergency lights, emergency position indicating radio beacons (EPIRBs), first aid equipment. Evidence is required for fire protection equipment, plus one further example.
- 3 All work practices must meet recognised codes of practice and documented worksite health and safety procedures (where these exceed code) for personal, product, and worksite health and safety, and must meet the obligations required under the Health and Safety at Work Act 2015, and any subsequent amendments.

Outcomes and performance criteria

Outcome 1

Assess maintenance and repair requirements for non-inflatable marine safety and survival equipment.

Performance criteria

- 1.1 Inspection of the item establishes all maintenance and repair actions required to achieve fitness for purpose.
- 1.2 Maintenance and repair requirements are matched with manufacturer's and/or regulatory requirements.

Range maintenance schedules, allowable type and amount of repair.
- 1.3 Comparison of repair requirements with company's capability establishes requirements for outwork.
- 1.4 Maintenance and repair requirements are quantified in terms of the materials and time required.
- 1.5 Comparison of predicted maintenance and repair cost with the value of the item establishes the cost-effectiveness of the proposed maintenance and/or repair.

Outcome 2

Carry out maintenance and repairs.

Performance criteria

- 2.1 Maintenance activities are carried out in accordance with manufacturer's instructions and company procedures.
- 2.2 Repair methods are selected and carried out in accordance with manufacturer's instructions and company procedures.
- 2.3 Repairs carried out restore items to operational fitness.
- 2.4 Maintenance and repairs are completed within agreed time-frames.

Outcome 3

Complete the maintenance and repair task.

Performance criteria

- 3.1 Equipment is tested to verify operational fitness in accordance with manufacturer's instructions and company procedures.

3.2 Equipment is prepared for use, storage, and transit in accordance with company procedures.

Range sealing, packing, identification of shelf-life requirement.

3.3 Documentation is completed in accordance with regulatory requirements, manufacturer's requirements, and company procedures.

Range labels, work cards, release notes, log books, service certification, regulatory certification.

Planned review date	31 December 2020
