

Title	Evaluate, clean, and prepare aluminium substrates for marine surface coatings		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to evaluate, clean, and prepare aluminium substrates for marine surface coatings.
----------------	--

Classification	Boating Industries > Boatbuilding
-----------------------	-----------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 All work practices must meet recognised codes of practice and documented worksite health and safety procedures (where these exceed code) for personal, product, and worksite health and safety, and must meet the obligations required under the Health and Safety at Work Act 2015, Resource Management Act 1991, Hazardous Substances and New Organisms Amendment Act 2015, and any subsequent amendments.
- 2 **Definition**
Workplace policies and procedures refer to the documented procedures and policies providing guidelines of the tasks and activities carried out in the workplace. This typically includes relevant health and safety policies to manage risk in the workplace.
- 3 **Range**
Aluminium substrates – bare, previously coated, unsound.
- 4 This unit standard assesses preparation activities of the substrate so that it can be filled and faired. It does not include filling and fairing, or the application of any surface coatings.

Outcomes and performance criteria

Outcome 1

Evaluate and clean aluminium substrates for marine surface coatings.

Performance criteria

1.1 Aluminium substrates are evaluated for soundness and corrosion, and action taken if unsound or deteriorated areas are found in accordance with workplace policies and procedures, and manufacturer's specifications.

Range welding strength, surface rupture.

1.2 Cleaning is undertaken to ensure the substrate is free of contamination in accordance with workplace policies and procedures, and manufacturer's specifications.

Outcome 2

Prepare aluminium substrates for marine surface coatings.

Performance criteria

2.1 Preparation method for the surface is selected relevant to the aluminium soundness.

2.2 Preparation methods of the surface are carried out in accordance with workplace policies and procedures to achieve coating manufacturer's and design requirements.

Range substrates preparation can be interior or exterior.

2.3 Protection for areas not to be coated is applied in accordance with workplace policies and procedures.

Planned review date	31 December 2026
