

Title	Provide residential security and risk advice as a locksmith		
Level	3	Credits	2

Purpose	People credited with this unit standard are able to identify residential property security risks and recommend security solutions.
----------------	--

Classification	Mechanical Engineering > Locksmithing
-----------------------	---------------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Unit 12925, *Demonstrate knowledge of locksmithing ethics* is recommended for entry into this unit standard.
- 2 Legislation
Health and Safety at Work Act 2015.
- 3 Definitions
Accepted industry practice refers to codes of practice and standardised procedures accepted by the wider locksmithing industry as examples of best practice.
Workplace procedures refer to the procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 4 Assessment information
All activities must comply with applicable workplace procedures and must be consistent with accepted industry practice.
Security and risk advice, as a locksmith, is limited to basic advice on simple things that can be done to reduce risk and improve a householder's security and property risks. This does not include advice on the type or style of locking devices that may be available for residential premises. There is another unit standard, Unit 12912, *Design residential and light commercial locking systems*, that covers locking device design for residential and light commercial premises.

Outcomes and performance criteria

Outcome 1

Identify residential property security risks.

Performance criteria

1.1 Visual deterrents and obstructions that may pose a security risk are identified.

1.2 Security problems in relation to access to the property that may pose personal risk are identified.

Range may include but is not limited to – lighting, trees, shrubbery, paths, building location.

Outcome 2

Recommend security solutions.

Performance criteria

2.1 The available security product range is identified and described in terms of purpose and function.

2.2 The available security services are described in terms of cost and performance.

2.3 Recommendations that match the product range with the identified security risks are made.

2.4 Recommendations that integrate existing security services with the identified security risks are made.
