Special notes

1 Definitions

Company requirements refer to instructions to staff on policy and procedures that are communicated in an oral or written form. These requirements must include legislation and safety requirements and may include but are not limited to, industry codes of practice and standards.

Processing includes cutting, shelling, freezing, and the use of all other methods of manufacture and preservation, as defined in the Fisheries Act 1996.

Manage systems in this unit standard may include but is not limited to the – development, implementation, application, monitoring, on-going improvement and audit of the systems to ensure legislative compliance with fisheries legislation.

- 2 Fisheries legislation requirements include but are not limited to the Fisheries Act 1996, associated regulations and subsequent amendments.

Elements and performance criteria

Element 1

Manage the systems for post-harvest seafood processing on a commercial fishing vessel.

Performance criteria

- 1.1 Systems are managed to ensure the post harvest processing of seafood is carried out in compliance with fisheries legislation requirements and company requirements.

Element 2

Manage the systems for gathering and validating processed catch and landing data.

Performance criteria

- 2.1 Systems are managed to ensure processed catch and landing data are gathered and validated in compliance with fisheries legislation requirements and company requirements.

Element 3

Manage the systems for the recording and reporting of seafood processing on a commercial fishing vessel.

Performance criteria

- 3.1 Systems are managed to ensure the recording of the processing of the seafood is carried out in compliance with the fisheries legislation requirements and company requirements.
- 3.2 Systems are managed to ensure the reporting of the processing of the seafood is carried out in compliance with the fisheries legislation requirements and company requirements.

Element 4

Manage the systems to update and implement fisheries legislation amendments.

Performance criteria

- 4.1 Systems are managed to ensure fisheries legislation amendments are received and appropriate changes made in accordance with company requirements.
- 4.2 Systems are managed to ensure fisheries legislation amendments are implemented on a commercial fishing vessel, in accordance with company requirements.

Please note

Providers must be accredited by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by NZQA before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
