

Title	Operate a cube wrapping system for tissue products		
Level	3	Credits	8

Purpose	People credited with this unit standard are able to: demonstrate knowledge of the operation of a cube wrapping system; operate a cube wrapping system for tissue products; and monitor and control the performance of a cube wrapping system.
----------------	---

Classification	Wood Fibre Manufacturing > Tissue Converting
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Legislation, regulations and/or industry standards relevant to this unit standard include but are not limited to the:
- Health and Safety at Work Act 2015
 - Resource Management Act 1991.

Any new, amended or replacement Acts, regulations, standards, codes of practice, guidelines, or authority requirements or conditions affecting this unit standard will take precedence for assessment purposes, pending review of this unit standard.

- 2 Definitions
- Tissue products* refer to bathroom tissue, towel, napkins, and facial tissue.
- Worksite policies and procedures* refer to documented policies and to documented or other directions provided to staff. These include but are not limited to – ways of managing health and safety, environmental considerations, quality, and production, and must conform to legislation. Examples include – standard operating procedures, company health and safety plans, on-site briefings, and supervisor’s instructions.

- 3 Assessment information
- Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable service information, worksite policies and procedures and legislative requirements. This includes the knowledge and use of worksite specific equipment, procedures, and practices.

This unit standard may be assessed in the workplace using naturally occurring evidence or in a simulated environment that demands performance equivalent to that required in the workplace. All activities and evidence must be in accordance with worksite policies and procedures.

This unit standard does not include loading and thread up of raw materials or the changeover of a cube wrapping system.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of the operation of a cube wrapping system.

Performance criteria

- 1.1 The operational capabilities of a cube wrapping system are described.
- 1.2 The purpose of the operating components of a cube wrapping system is explained.
- Range operating components may include but are not limited to – roll infeed, unwind stand, poly feed, shear blade, folding box, overhead flights, heater bar, discharge, control panels, conveyors, diverter, vacuum system.
- 1.3 Hazards associated with a cube wrapping system and the role of relevant protective equipment and safety features are explained.
- Range hazards may include but are not limited to – in running nips, moving parts, automated processes, sharp edges, hot machine parts, chemicals, noise; evidence of a minimum of five is required; safety features may include but are not limited to – energy isolation procedures, lockouts, emergency stops, guards.
- 1.4 The consequences of non-conformance with worksite policies and procedures are explained.

Outcome 2

Operate a cube wrapping system for tissue products.

Performance criteria

- 2.1 Safe work practices associated with operating a cube wrapping system are demonstrated.
- Range practices may include but are not limited to – energy isolation procedures, lock outs, emergency stops, machine guarding, wearing of appropriate safety equipment.
- 2.2 Incoming products to be packaged are assessed against specification and action is taken on non-conforming products.
- 2.3 Wrapping system is started up, operated, stopped and shut down.
- 2.4 Product quality is achieved by means of setting and/or adjustment of specific operational systems.

2.5 Equipment faults, malfunctions, and damaged or worn-out plant are identified and reported.

Range equipment faults may be – mechanical, electrical, pneumatic.

2.6 Lubrication of the cube wrapping system is maintained.

2.7 The cube wrapping system and work area are cleaned and prepared for next use.

Outcome 3

Monitor and control the performance of a cube wrapping system.

Performance criteria

3.1 Productivity and quality is maintained by monitoring performance and adjustment of control parameters.

3.2 Waste is minimised and recycled.

3.3 Rejection of any out of specification product is carried out.

Planned review date	31 December 2028
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	29 June 1999	31 December 2012
Review	2	23 November 2003	31 December 2012
Rollover and Revision	3	26 January 2007	31 December 2012
Review	4	21 July 2011	31 December 2026
Review	5	29 June 2023	N/A
Revision	6	28 August 2025	N/A
