----------------	---

Classification	Fire and Rescue Services > Fire and Rescue Services - Structural and Industrial
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- Definitions
Community risk management describes a methodology that can be applied to manage natural and man-made conditions that present risk or danger to the public, property, commerce, or the environment. The reference for community risk management is AS/NZS 4360:2004 *Risk management*.
Local community describes the candidate's own fire and rescue district.
- For the purposes of assessment, candidates are required to demonstrate knowledge of community risk management issues in their local community.

Outcomes and performance criteria

Outcome 1

Identify the key elements of community risk management across community conditions.

Range community conditions may include but are not limited to – socio-economic variables, environmental factors, community structures and types, human behaviour.

Performance criteria

- 1.1 Community conditions are identified in the local community.
- 1.2 The key elements of community risk management outlined in AS/NZS 4360:2004 are identified.
- 1.3 Community risk management is identified in relation to community conditions.

Outcome 2

Use community risk management terminology in specified community risk situations.

Performance criteria

2.1 Key community risk management elements are expressed by risk management terms used for specified community risk situations.

Range a minimum of three of – emergency risk management, environment, hazards, lifelines, likelihood.

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.
