Subfield Clothing Manufacture

Domain Embroidery

Status Registered

Status date 19 June 2009

Date version published 19 June 2009

Planned review date 31 December 2015

Entry information Open.

Accreditation Evaluation of documentation by NZQA and industry.

Standard setting body (SSB) Competenz

Accreditation and Moderation Action Plan (AMAP) reference 0030

This AMAP can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Special notes

- 1 This unit standard is intended for people working in the embroidery industry.
- 2 Competence will be demonstrated on the type of machine installed in the candidate's workplace.
- 3 Competence will be demonstrated on a range of products produced in the candidate's workplace.
- 4 Performance of the elements must comply with the Health and Safety in Employment Act 1992.

5 Definitions

Product specifications refer to the documentation that accompanies each product order. This documentation sets out the fabric to be used, the marking methods to be used, the embroidery equipment to be used, and the quantity of goods required.

Workplace procedures refer to the verbal or documented procedures for performing work activities and include health and safety, operational, environmental, and quality management requirements. They may refer to manuals, manufacturer's specifications, codes of practice, or policy statements.

Elements and performance criteria

Element 1

Compare embroidered goods with product specifications.

Performance criteria

1.1 Samples and product specifications relate to the embroidery being examined.

1.2 Embroidered item meets product specifications.

Range colours, design on face, design on back, balanced stitch for each colour.

Element 2

Identify faults and take corrective action.

Performance criteria

2.1 Faults on embroidered goods are recognised, their cause identified, and actions taken to correct faults are in accordance with workplace procedures.

Range faults may include but are not limited to – miss-stitching, unbalanced stitching, needle marks, operator faults, yarn faults, material faults.

2.2 Embroidery machine faults are recognised, their cause identified, and actions taken to correct machine faults are in accordance with workplace procedures.

Range faults may include but are not limited to – mechanical faults, electrical faults, electronic malfunctions.

Please note

Providers must be accredited by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by NZQA before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
